

One connected platform that fits the way your business actually runs.

Built for businesses with a lot of things to track and manage. Enter it once; it flows everywhere, including into QuickBooks™.

Sound familiar?

- ✓ Paper everywhere
- ✓ The same information typed two or three times
- ✓ A pile waiting to go into QuickBooks
- ✓ Walking the floor to find out where a job stands
- ✓ The whole business lives in the owner's head

Running on paper, spreadsheets and a stretched QuickBooks? Results was built for you.

Why Results is Different

Most tools handle one piece of the business while paper, spreadsheets, and people fill the gaps.

Results is one connected system that configures around your systems and processes. Not a template.

One connected system. Synced automatically with QuickBooks.

What changes with Results

Enter it once, it flows everywhere

Type it once, where the work happens. It flows from the estimate to the plan, the schedule, the invoice, payroll, and QuickBooks. No retyping, no reconciling, no second-guessing the numbers.

"I had to double enter everything to keep QuickBooks updated... That's a thing of the past now that we have Results."

Kathy Moore, Pentecostal Church of God

Nothing falls through the cracks, however many steps

Results follows your business's own steps, in your own order, so jobs don't skip ahead before they're ready. The system knows the next step and who owns it, making handoffs seamless.

"Using Processes helped us go beyond what we were previously able to do for customers."

Kasey Sanders, A-1 Guaranteed Heating and Cooling

Everyone sees the truth, right now

Open it in the morning and the whole story's right there. Know what's in play, what's next, who owns it. Anyone on the team can answer the phone with a real answer instead of "let me check and call you back."

"It makes management easy. I don't have to guess at what each person is doing, or the status of each client job."

Philip Sanders, A-1 Guaranteed Heating and Cooling

Fits your business, not the other way around

Configured to match how you actually work, and easily adjusted as things change. Track exactly what your business needs to track, not just what a generic software package assumed you would.

"We thought we could do better with Salesforce and found we couldn't. So we were happy to return to Results!"

Katie Malone, AVI

Grow without hiring an army

The same system that runs one job runs a thousand. Grow the business without hiring a small army just to keep it coordinated.

"We have grown over 50% in the last two years, but our headcount has only increased by 8%, and we attribute that success to this application."

Steve Williams, Roll-A-Shade

IN OUR CUSTOMERS' WORDS

"I can get an ERP, I can get a manufacturing system, I can get a CRM... but nothing does it all except Results."

Mike Erickson, Canvas Designers

"I love the calendar feature in Results so I can go to the date and see who's working and where, so that payroll is accurate."

Michelle Miller, Advanced Mechanical USA

BUSINESSES LIKE THESE RUN ON RESULTS

Field Service Management: HVAC, Plumbing, Electrical, Compliance Inspection, Landscaping and Tree Services, etc.

Custom Manufacturing including Job Shop Businesses
